

R.W. Rogers Company

BenchLine Wall Unit

R.W. Rogers BenchLine displays can be configured as an island unit, wall unit or single display unit. Build your own concept. Starter base units are 24" x 60". Total bench heights are 30", 44" & 72". Shelves can be positioned flat or tilt for better product visibility and can be adjusted at six inch increments. Back to back units are held together with spider clips to prevent separation.

Structural foam plastic shelves (21" x 55"), rust resistant e-coat (powder coated) frames, available with or without locking casters.
