GARDEN CENTER COUNTERS—Components and Configurations

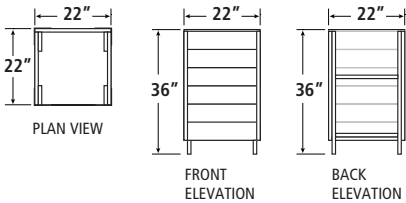

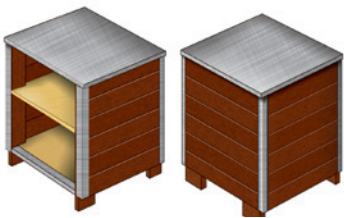

The R.W. Rogers modular checkout system is a versatile solution for your temporary or permanent counter needs. The 22" x 22" and 46" x 22" base units can be combined in different configurations to create the ideal checkout system for your location. The counters are constructed of a combination of reclaimed wood and plastic fibers creating an environmentally friendly and durable product. The galvanized counter surface adds to the functionality and creates the perfect choice for indoor and outdoor use. Configurations include but are not limited to the following.

(Optional accessories include: Lane Lights, Casters and Drawers)
