## MATERIAL HANDLING

Tough structural foam beds and trays are formed with high quality resins and molded to withstand heavy loads with minimum maintenance. We offer nesting and non-nesting flatbeds that are unique in the industry. The beds are designed to reduce water tracking and keeping merchandise from slipping. The elimination of metal surfaces reduces rust, increases the cart life, reduces the need for repairs and provides a more appealing cart to our customers.

To compliment our line of plastic deck flatbed carts, R.W. Rogers also offers a wide variety of products such as U-boats, moving dollies, rail carts, lumber carts, pallet jacks, shopping carts and more.

NESTING AND NON-NESTING FLATBEDS

Constructed of a heavy-duty, injection-molded plastic deck and a powder-coated steel frame, our flatbeds are suitable for both indoor and outdoor environments. The decks are lightweight, yet have a very high strength-to-weight ratio. The plastic will not rust, and is resistant to discoloration and warping. The textured surface of the plastic will help keep products in place when in motion. An impact-absorbing front bumper is also available as an optional accessory.

PLASTIC FLATBED WHEEL OPTIONS

These wheel options can be selected for the following four products. When ordering, please indicate either a -R or -P after each model number to represent your selection of wheels.

MOLD ON RUBBER REPLACEMENT WHEEL (R)

- Model #RWR-PHC-CAS8586RMO: wheel with caster
- Model #RRWR-PHC-WRMO0620A: wheel only

OR

POLY REPLACEMENT WHEEL (P)

- Model #RWR-PHC-CAS858-6: wheel with caster
- Model #RWR-PHC-W853-6: wheel only

NESTING FLATBED CART WITH HAND BASKET RACK

- Model #RWR-FB-2448: 27" W x 55" L x 39.5" H
- 6" x 2" mold on rubber wheels
- Powder-coated steel frame
- Injection-molded plastic deck
- Optional hand basket handle, hand basket sold separately
- Weight capacity: 2,000lbs.
