RW ROGERS
COMPANY

Solutions to streamline
your retail environment

SINCE 1963

Longevity. Innovation. Excellence.

The R.W. Rogers Company was established in 1963 as an organization dedicated to supplying new and used grocery shopping carts to local customers in the Midwest.

Our company has grown since then to now offer a full line of equipment to our customers nationwide, while keeping true to our Midwest roots. Our product line has expanded to garden carts, grocery shopping baskets, hand baskets, nursery carts and more.

In addition to expanding our product offerings, our warehouse has grown from a modest 4,000 square feet to an impressive 60,000 square feet. Our facility is not the only aspect of our business that has expanded. While we still recondition used equipment and represent various manufacturers, we have also successfully transitioned into importing and manufacturing a wide variety of retail solutions ourselves.

Our customers experience the unmatched service and quality products that our company provides that they have been accustomed to since our company began.

Give your shopping cart fleet an upgrade

Retrofit your shopping carts with any of these easy-to-install accessories, and instantly create a more modern and enjoyable shopping experience for your customers.

We've got you covered.

1 Ergo XT

Perfect ergonomics and modern design for your shopping carts.

By adding the Ergo XT to your current shopping cart fleet, you not only offer greater ease of use, they also make the shopping cart look great. The upright design ensures a natural positioning, so pressure is taken off the wrists. Even fully loaded shopping carts are much easier to maneuver. The ergo XT can be fitted to all standard shopping cart models and is attached with only two screws. The system is designed so that the shopping cart handle remains fully intact. The entire fleet can be retrofitted quickly and easily at any time. Static charge on shopping carts builds up and leads to unpleasant shocks when touching the cart. Built-in anti-static technology prevents this from happening.

KEY FEATURES INCLUDE:

- **Ergonomic**
Natural ergonomic position of hand and wrist.
- **Easy mounting**
Using only two screws, the Ergo XT can be easily mounted.
- **Anti-static**
Inserts on each side ensure it will be de-charged with each use.

2 liveTec EASY

The easy and convenient way to shop.

Our innovative smartphone holder system not only makes shopping using a smartphone much simpler, it is also ideal for marketing and advertising purposes. Simply attach a QR code leading directly to the retailer app onto the EASY to heighten customer awareness and increase user numbers. The EASY is a cost-effective solution that works with smartphones of different sizes—with or without a protective case. The smartphone is simply pushed into the holder, and can quickly be removed by the customer for safekeeping. It holder can be retrofitted to almost all shopping cart handles with just one screw and gives the market a modern, innovative image.

KEY FEATURES INCLUDE:

- **Quick mounting**
Mounts to almost all shopping carts with only one screw.
- **Easy to use**
The smartphone is pushed into the holder from above and is immediately ready to use for shopping.
- **One size fits all**
The EASY can accommodate large or small smartphones, with or without a protective case.

3 SmartSafe Twin

Keep children safe while shopping with parents.

SmartSafe is the revolutionary seat belt system that fits onto almost any available shopping cart. SmartSafe provides safety for the child by automatically adjusting to the size of the child. This effectively prevents the child from standing up into the shopping cart, and allows for a relaxed shopping experience for parents. SmartSafe is available for shopping carts with a single or double child seat. With SmartSafe, there's no strap adjustment needed. Simply pull out the belt, wrap it around the child, and snap in the latch. Once snapped in, the belt is secured. While not in use, the SmartSafe seatbelt retracts into its plastic housing to protect it against rain and dirt.

KEY FEATURES INCLUDE:

- **Simple**
Pull out the belt, wrap it around the child, and snap in the latch.
- **Cost effective**
Securely stowed away when not in use and designed to last for the lifetime of a shopping cart, reducing service costs for belts and shopping carts.
- **Clean**
Retracts into housing for protection from the elements.

Freshen up your flatbeds

Give your flatbed carts a new set of wheels and make maneuvering heavy loads much easier for your customers and staff.

REPLACEMENT PARTS:

- A 6" wheel with swivel caster
- B 6" x 2" wheel
- C 8" x 2" wheel
