

Keep children safe while shopping with parents.

SmartSafe is the first revolutionary retractable seat belt system on the market.

What parents appreciate – safety for their children.

SmartSafe

SmartSafe provides safety for the child by automatically adjusting to the size of the child eliminating the human error factor. This effectively prevents the child from standing up into the shopping cart, and allows for a relaxed shopping experience for parents. SmartSafe is available for shopping carts with a single or double child seat. With SmartSafe, the seatbelt adjusts automatically to the child keeping them safe. Once snapped in, the belt is secured. While not in use, the SmartSafe seatbelt automatically retracts into the high impact plastic housing which prevent belts from being damaged or locking up with other gates. It also protects against any rain or airborne dirt keeping the seatbelts clean, safe and ready to use.

- **Simple**
Pull out the belt, wrap it around the child, and snap in the latch.
- **Clean**
Retracts into housing for protection from the elements.
- **Feelgood factor**
Make SmartSafe part of your campaign for a child-friendly environment.
- **Cost effective**
Securely stowed away when not in use and designed to last for the lifetime of a shopping cart, reducing service costs for belts and shopping carts.
